|          |             | : Electrode |

(in mm)

Other Usage

For general

Packaging Information

# Features

The chip ferrite beads BLM series is designed to function nearly as a resistor at noise frequencies, which greatly reduces the possibility of resonance and leaves signal wave forms undistorted.

BLM series is effective in circuits without stable ground lines because BLM series does not need a connection to ground.

The nickel barrier structure of the external electrodes provides excellent solder heat resistance. BLM\_K series can be used in high current circuits due to its low DC resistance. It can match power lines to a maximum of 6ADC.

# **Product Data**

In operating temperature exceeding +85°C, derating of current is necessary for BLM18KG series. Please apply the derating curve shown in chart according to the operating temperature.

Derating of Rated Current

### Impedance-Frequency Characteristics

### Derating of Rated Current

(Resistance element becomes dominant at high frequencies.)

Equivalent Circuit
